WILDLIFE & SAFARIS

All members of the Big 5 – the elephant, lion, rhino, buffalo and the elusive leopard – are represented at Inverdoorn. The game is thriving and during your safari you may come across herds of eland, gemsbok and zebra, or hippos wallowing in the dam. The rhinos are a distinct highlight at Inverdoorn.

Game drives focus not only on the Big 5 but on the entire eco system, with great birding opportunities (with a bird count in the region of 165) as well as an insight into the fascinating vegetation in this area of the Karoo.

Inverdoorn is well known for its spectacular "tower of giraffe" that thrive in the expansive acacia river beds that winds its way through the reserve. The game reserve is also home to a cheetah rescue and rehabilitation centre which has an ethics committee that ensures that the cheetah are not negatively impacted by educational programs so necessary in the fight against their extinction. There is a strict "no touch" policy in place at the reserve.

Cheetah Conservation:

There are 14 cheetahs that have been rescued by Cape Cheetah. Many of them, such as Banzi and Nushka, have heart-warming – and heart-breaking stories. A rehabilitation and breeding program is underway under the guidance of an Ethics Committee headed up by Chris Mecer, founder of Campaign Against Canned Hunting. Guests are able to see the Cheetah in an environment that does not impact negatively on the cheetah. No touching or human imprinting
